

● robot / microrobot ● patient hand

a

Simulation environment

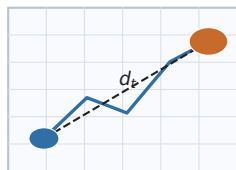

table-top pursuit task

CMD-DR virtual patient

intent: SPC / learned hand

motor layer: delay, noise, LPF, accel. limit

ZPD reward + boundary

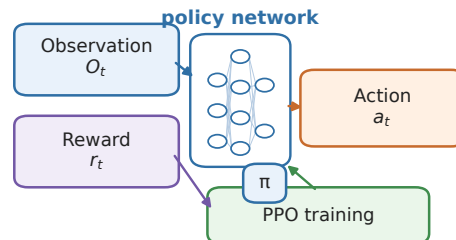

O_t, r_t

a_t

same task

b

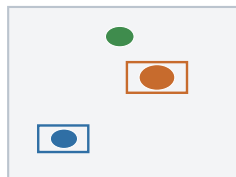

RL policy setting

trained policy

c

Vision and state estimation

camera frame / detection overlay

async vision thread

YOLO microrobot

MediaPipe hand

state buffer +
dead reckoning

image feed

real O_t

d

Real-world rehabilitation platform
